

Pharmaceutical Disposal

Recent studies have revealed the increasing presence of prescription medicine waste in our nation's waterways. Unwanted and outdated medications are being improperly disposed of, creating a dangerous situation for our ecological system.

The illegal use of prescription medications among school-aged children has increased. Investigations have suggested this is partially due to the easy accessibility of these medications to our children.

Please dispose of unused medications by dropping them off at the Green Sweep organized by the Chippewa County Drug Response Task Force on:

Saturday, April 24 from 8 am – Noon

Chippewa Falls Street Department
5 Riverside Drive, Chippewa Falls
* NEW LOCATION

Did you know that persons may drop off unused medications anytime during business hours at your local police departments.
