

**Agreement of  
Consent to Release Field and Crop Management Information  
To Chippewa County**

I would like to wisely use and conserve the soil and water resources on my land. To do this, I intend to use my land within its capabilities and treat it in accordance with its needs using the State of Wisconsin agricultural runoff performance standards as defined in Wisconsin Statutes Administrative Code NR151.

To accomplish this objective, I will be using technical services provided by the Chippewa County Land Conservation Department, under the direction of the Chippewa County Land Conservation Committee.

To facilitate these services, it will be necessary for me to provide current information about field management and cropping practices used in my operation.

It is my understanding that such information is of a "proprietary nature", as defined by the US Department of Agriculture, and that the records maintained by its agencies are not now accessible by Chippewa County.

In the interest of efficiency, I hereby agree and consent to:

The release of that part of my local USDA files, as maintained by the Farm Service Agency (FSA) and the Natural Resource Conservation Service (NRCS), to the Chippewa County Land Conservation Department, including any information of record that is related to past and current field management, cropping practices, and conservation program participation that is of a proprietary nature, pursuant to and in accordance with the provisions of 16 U.S.C. 3844(b)(2)(D)(i).

I acknowledge that by releasing my Federal files, the information contained therein could be used for the enforcement of Federal, State or local ordinances, laws or rules and I understand that without my consent, as provided hereby, the information contained in those files can be released only as set forth at 16 U.S.C. 3844.

It is my understanding that this service agreement and authorization for information release will remain in effect until I cancel it in writing.
